VENDOR EVALUATION FRAMEWORK

# ALPR Values Frame

## Audit & Control

Strong access controls, documented policy, routine audits, and meaningful public transparency.

## Essential for Safety

Demonstrated operational value in high-risk cases, supported by clear, real-world examples—not generalized or unlimited surveillance aims.

## Data Control & Security

Agency control of access, retention, and sharing; strong cybersecurity; legal conformance; and no problematic entanglements with unrelated commercial enterprises.

## Privacy-Conscious Footprint

A limited deployment footprint aligned to the vision—proportionate to need and designed to mitigate privacy concerns.
